Joint Meeting MMIJ-AIME 1972, TOKYO May 24-27

Publications of Joint Meeting, held at Tokyo May 24-27, are as follows:

I. Technical Papers

108 preprints

GENERAL SESSION

- I Exploration of mineral deposits
- II Status of mining technology
- III Processing, smelting, and environmental quality control

TECHNICAL SESSION

- I Exploration of petroleum, coal deposits, porphyry copper and stratified sulfide deposits
Petroleum engineering
- II Open cut mining
Development and mechanization of modern coal mines
Mine safety and utilization of coal
Ore extraction by block caving, Specially supported stoping of ore deposits
- III Environmental quality control in mining and metallurgy
Process control in mineral processing and coal preparation
Mineral processing of complex ores, and magnetic separation
- IV In-place leaching
Extractive metallurgy of marginal raw materials, copper, zinc, and lead
Recent progress in smelting and refining of copper and nickel

2. Excursion guidebook
